

Constraints

- 1 Woodland/scrub and pond, with connected ditches. Otter and reptiles confirmed. Propose to retain and enhance, where feasible.
- 2 Open fields, woodland and mature trees. Potential for dormice, bats, badger and invertebrate species. Potential for enhancement.
- 3 Mosaic scrub. Reptiles (slow-worm) present. Mitigation for loss of habitat likely to be required. Numerous bird species nest here. Barn owl roost present and should be retained where possible. Propose retention and enhancement of peripheral habitats for birds, reptiles, invertebrates and plants, where appropriate.
